

JULY – 3rd CLUE

Square in a Square Units

Combine 34 Fabric A squares (4" x 4") + 34 Fabric C squares (4" x 4") + 34 Fabric B squares (4 ¾" x 4 ¾") to form 34 'Square in a Square' (SiaS) units (6 ½" x 6 ½") using the method below.

1. Cut each Fabric A square (4" x 4") and Fabric C square (4" x 4") in half once diagonally to form 68 Fabric A triangles (4" x 4") and 68 Fabric C triangles (4" x 4").

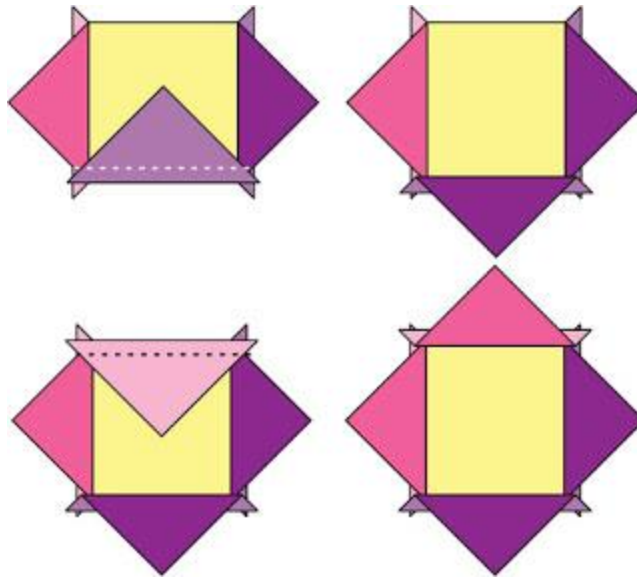

2. Center a first Fabric A triangle (4" x 4") along a first side of a Fabric B square (4 ¾" x 4 ¾"). Sew along the edge with a scant ¼" seam (shown as a dotted line), pressing the seam open or outwards.

3. Sew a first Fabric C triangle (4" x 4") on the side of the square opposite to the first side, pressing seam open or outwards. (Note: you can sew both of these triangles on then press instead of pressing after each addition.)

4. Continue by sewing a second Fabric A triangle and a second Fabric B triangle onto the square, pressing seams open or outwards. Make sure that the Fabric A triangles are next to each other rather than across from each other.

5. Trim off the tabs (dog ears) formed by the sewn on triangles and square the unit to $6\frac{1}{2}'' \times 6\frac{1}{2}''$ (if necessary) making sure there is $\frac{1}{4}''$ between the corner of the inner square and the outer side of the unit. Repeat to form a total of 34 SiaS units ($6\frac{1}{2}'' \times 6\frac{1}{2}''$).
